Body
Composition
Analysis at

Lindora is the expert in medical weight control. For over 35 years, we've offered the care, support and guidance to help people reach their weight loss goal. Lindora Health Clinic uses a state-of-the-art electronic Body Composition Analyzer to measure your body composition—amount of lean body mass in proportion to the amount of fat tissue in your body. It's easy and fast. Simply stand on the Body Composition Analyzer scale for about ten seconds and our friendly nurses will review your results and help guide you to finding ways to reach your goals.
